

LMI CUSTOM CONTROLS

LAIDIG MACHINE INTERFACE

Providing state-of-the art control and user interface systems to maximize efficiency and safety of Laidig material handling solutions

- Reduces & simplifies startup time
- Saves up-front programming time
- Reduces wiring cost with ethernet cable
- Reduces wear and increases efficiency
- Full access to system variables with minimal risk of abuse

Laidig Quality

The brain of the Laidig reclaimer, the Laidig Machine Interface (LMI), provides operational security to ensure dependable, long term operation of Laidig's material handling solutions. The LMI offers unprecedented control & monitoring of the reclaimer's status and operation. Its comprehensive logging functions provide a constant flow of data to help fine tune the operation of your Laidig reclaimer. Laidig's engineering and service teams utilize their 50 years of material handling experience to develop the most feature-rich control system available, specifically tailored for each Laidig solution.

Benefits:

- Full data monitoring & alarm logs
- Multi-language support
- Advanced reclaimer control & tuning
- Remote monitoring & programming
- Adapts to changing material conditions
- Allows connectivity to site control system
- Ensures equipment is operated in accordance with safety standards

Serviceability

The LMI was designed, not only to provide cutting edge functionality, but also to reduce both maintenance and service costs. Fully supported by Laidig's engineering and service teams, the LMI allows for fast maintenance & repairs while reducing costly equipment down-time. The LMI's remote monitoring & programming provides quick modifications for time-critical processes.

Touchscreen HMI

Our new & improved LMI control system allows easy access to all functions needed to keep your material handling operations running smoothly. The bright, fully-customized touch screen conveniently displays operating parameters, auger position and speed, data logs, advanced reclaimer controls & other crucial functions.

Take control of your material handling solution with the Laidig LMI
